MY SKILLS

I started my career as a Graphic Designer. I have excellent four years of hands-on experience gained by doing freelance on different platforms. I have a great hands on grip on Adobe's Softwares as mentioned in statistics.

I'm currently doing my bachelor in Software Engineering. I have been learning programming. That's what demands a software engineer learn to develop and build software.

I have learned several languages: PYTHON, CPP, JAVA and HTML/CSS. I have completed several semester projects based on these languages. You can visit my github to check out the several projects completed.

I also have an excellent management skills set that helps me to be a Social Media Designer and Manager. I'm still learning to make myself grow as a WordPress designer & developer as well.

I was so cursed to learn and being a part currently learning User Interface Design & User Experience (UI/UX). It'll advance my current skills set as part of the design field and would be beneficial for me as a part of software. I can manage myself in design and development.
